

How To Apply Your 3rd Brake Light Decal Clio MK1

For optimum results, apply decal at room temperature (55 to 75 degrees) or above

**THIS DECAL IS TO BE FITTED TO THE LIGHT LENS ON THE
TAILGATE**

PLEASE NOTE:

***WE WILL NOT BE HELD RESPONSIBLE FOR ANYONE THAT DOES NOT ADHERE
TO THE INSTRUCTIONS AS LAID OUT OR IF THEY HAVE BEEN DAMAGED WHILST
FITTING***

**DUE TO THE CURVED SURFACE OF THE BRAKE LIGHT (see above), THE VINYL DECAL DOES NOT COVER THE COMPLETE LENS AND
WILL HAVE 5MM GAP AROUND THE EDGE. LIGHT WILL NOT SHOW THROUGH THIS AREA ANYWAY**

Clean the surface thoroughly with a lint-free cloth

For best results, the surface must be clean and free of all waxes and residue

Slowly pull the backing (heavier gauge paper) off from the decal

**If part of the decal moves out of its original position, you can put it back into place
by pushing the backing down and move the decal back to its original position**

Ensure the decal is lined up straight and central before attaching

Rub along the decal with your finger gently smoothing it down

Remove the masking tape, peeling from the corner and pulling back really slowly
