

How To Apply Your 3rd Brake Light Decal

For optimum results, apply decal at room temperature (55 to 75 degrees) or above

3rd BRAKE LIGHT DECAL

**THIS DECAL IS TO BE FITTED TO THE LIGHT LENS
NOT THE WINDSCREEN**

**For instructions on how to remove the brake light for fitment of the decal
(if applicable) please refer to your vehicle handbook**

PLEASE NOTE:

***WE WILL NOT BE HELD RESPONSIBLE FOR ANYONE THAT DOES NOT ADHERE
TO THE INSTRUCTIONS AS LAID OUT OR IF THEY HAVE BEEN DAMAGED WHILST FITTING***

Clean the surface thoroughly with a lint-free cloth

For best results, the surface must be clean and free of all waxes and residue

Slowly pull the backing (heavier gauge paper) off from the decal

**If part of the decal moves out of its original position, you can put it back into place
by pushing the backing down and move the decal back to its original position**

Ensure the decal is lined up straight and central before attaching

Rub along the decal with your finger gently smoothing it down

Remove the masking tape, peeling from the corner and pulling back really slowly
